

Paulo Vicente

Software Engineer

As a seasoned frontend developer with extensive experience mostly in **Typescript** and **React.js**, I have developed numerous high-performing and scalable web applications that are optimized for speed, efficiency, and user experience.

Over the years, I have honed my skills in **Typescript** and **frontend** development, enabling me to deliver top-notch projects in diverse industries, including e-commerce and finance.

In addition to my technical expertise, I have a keen eye for design and understand the importance of crafting visually appealing interfaces that enhance user engagement.

Whether working on greenfield projects or refactoring legacy codebase, I take pride in my ability to build robust and maintainable code that is easy to test and deploy.

With my solid experience in **frontend** techs, I am confident in my ability to deliver outstanding results and take on new and exciting challenges in frontend development.

PROFESSIONAL EXPERIENCE

2023-04 -
Current

Frontend Software Engineer

Aggrandize, Remoto
